

» Supply Ordering Made Simple

Take the Hassle Out of Replenishing Printer Supplies

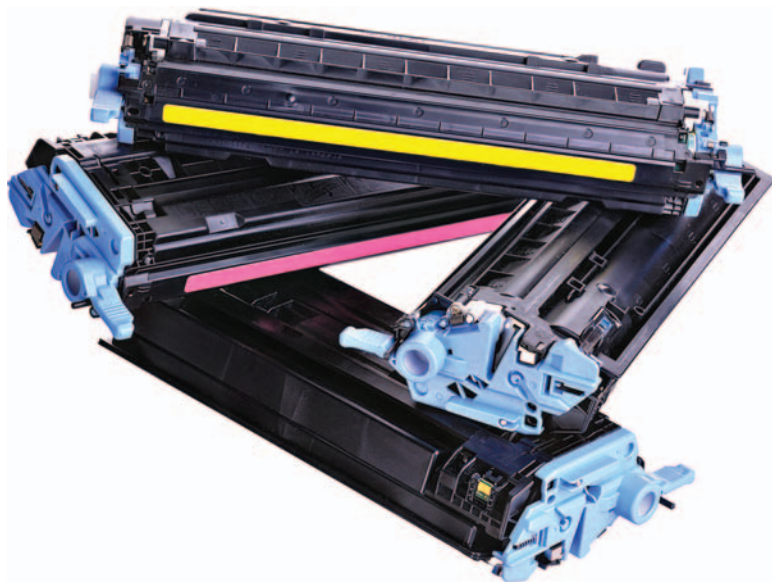

Our Supply Concierge Service greatly simplifies printer supply ordering for your entire printer fleet by automatically delivering toner and consumables right when you need them. We make it easy to procure printing supplies at a competitive price, simplify every aspect of ordering, and provide unmatched convenience.

Increase Efficiency and Save Valuable Time

- Our just-in-time automated delivery eliminates the need to order supplies and consumables. We will proactively monitor your printer fleet and ship supplies and consumables to one or multiple locations. Each delivery is clearly marked with the appropriate building, floor, and contact name.
- Free up personnel to focus on key projects and initiatives.
- Spend less time managing your print devices and reduce downtime and costly rush deliveries caused by printers without toner.
- We offer top-quality supplies with reliable performance for nearly every major networked printer and multifunction brand.
- Eliminate stocking supplies or maintaining an inventory that ties up your monetary resources.
- We process your order within 24 hours and offer FREE shipping.
- We provide one simplified monthly invoice, and you only pay for the items that are shipped each month. This reduces your purchase requests to one monthly invoice and one purchase order.
- Our dashboard reporting provides 24 x 7 visibility into all your networked print devices.
- Our service gives you a single point of contact for your multi-vendor print fleet.
- If you need additional supplies for a large project, it's never a problem. Let your Account Manager know about the project, and we will ship additional consumables to your specified location.

How Supply Concierge Service Works

We will help you install a simple piece of software to monitor your printer supply levels. When supplies run low, we automatically ship you toner and consumables. This software application provides secure, one-way communication to a protected data center. No personal or user data is collected, and the software requires virtually no PC or network resources to operate. You can monitor all of the transmitted data via your complimentary customer portal.
