

Scale Computing HyperCore Implementation Services

What Is Scale Computing HC3?

Scale Computing HC3 is a modern hyperconverged infrastructure (HCI) platform designed to simplify and optimize virtualization infrastructure for organizations of all sizes. By integrating compute, storage, hypervisor, and DR into a single solution, HC3 improves operational efficiency and ensures high availability while reducing infrastructure complexity. HC3 empowers IT teams to focus more on strategic initiatives and less on managing and maintaining their virtual infrastructure.

Scale Computing HyperCore:

The intelligent software layer at the core of the HC3 platform delivers built-in virtualization, storage management, and high-availability (HA) features in a lightweight, self-healing infrastructure.

Scale Computing Fleet Manager:

A cloud-based management platform providing centralized management and visibility over multiple HC3 clusters. FM enables IT teams to deploy, manage, and monitor HC3 clusters across distributed sites from a centralized console.

Why Connection?

Connection offers products, technical expertise, services, and solutions to help your business adapt to the ever-changing technology landscape. Connection designs and deploys infrastructure solutions tailored to each customer's unique business needs, enabling them to optimize spend while enhancing agility.

Today's data centers demand simplified management, efficient resource utilization, and streamlined virtual infrastructure deployment. As organizations are faced with increased infrastructure expenses and the rising costs of existing virtualization licenses, many organizations are in search of a more budget-conscious alternative. Scale Computing addresses these challenges by delivering an easily scalable and user-friendly solution that optimizes costs without sacrificing essential performance and functionality.

Customer Benefits of the Scale Computing HC3 Platform

Connection helps your organization get the most out of your Scale Computing investment by simplifying virtualization infrastructure deployment and increasing operational efficiency. Whether you are starting a new virtualization journey or expanding your existing deployment, our Scale Computing specialists provide expert guidance at every phase—from initial planning and design to deployment and optimization—enabling your organization to quickly realize the full potential of Scale Computing. Benefits include:

- **Simplified IT Operations:** Streamline day-to-day management with a fully integrated hyperconverged platform that unifies compute, storage, hypervisor, and disaster recovery, reducing complexity and freeing up critical IT resources. Scale provides the flexibility to support multi-branded nodes of varying sizes within the same cluster.
- **Near Zero Touch Provisioning and Centralized Management:** Quickly deploy scalable, self-healing infrastructure at the edge with minimal IT intervention while maintaining simplified lifecycle management across distributed locations.
- **Enhanced Resiliency and Availability:** Built-in high availability, automated failover and seamless scalability make HC3 ideal for small data center and edge deployments. This enables organizations to adapt quickly to changing demands and ensure business continuity as they grow.
- **Reduced Infrastructure Costs:** Eliminate the need for expensive and complex licensing by consolidating your virtualization infrastructure into Scale Computing's all-in-one solution—delivering significant savings through accessible pricing for small to mid-sized environments and edge locations.

Connection Scale Computing Professional Services

- **VM Migration and Implementation Services:** Connection's proven methodology and certified engineers provide comprehensive services for migrating workloads from legacy hypervisors to Scale Computing HC3. We help organizations modernize their infrastructure through rapid deployment, seamless migrations, minimized downtime, and operational disruptions.
- **Data Protection and Disaster Recovery:** Whether leveraging Scale Computing HC3's native snapshot and replication capabilities or integrating with third-party solutions, Connection designs and implements resilient data protection strategies tailored for your environment, ensuring business continuity and compliance with SLAs.
