

SECURITY ASSESSMENT SUITE

In the current digital landscape, an organization's security is defined by its most vulnerable point. Our Security Assessment Suite identifies and mitigates vulnerabilities within your infrastructure to ensure data protection and business continuity. With optional, flat-rate services, you can tailor the assessment to your specific needs.

Our Approach to Security Risk Assessment and Remediation

Connection customizes this service to identify vulnerabilities in your organization's tools, systems, and policies. Our approach uses a series of optional, individual components to create a comprehensive security perspective, assessing the entire infrastructure instead of just individual components.

- Internal and External Vulnerability Assessments
- Internal and External Penetration Testing
- Cybersecurity Network Assessments:
 - Firewall, Switch, and Router Configuration
 - Wireless Security Testing
- Cloud Cybersecurity Analysis
- Microsoft Active Directory Cybersecurity Analysis
- Web Application Cybersecurity Analysis
- Social Engineering and Security Awareness
- Security and IT Policy Review and Development

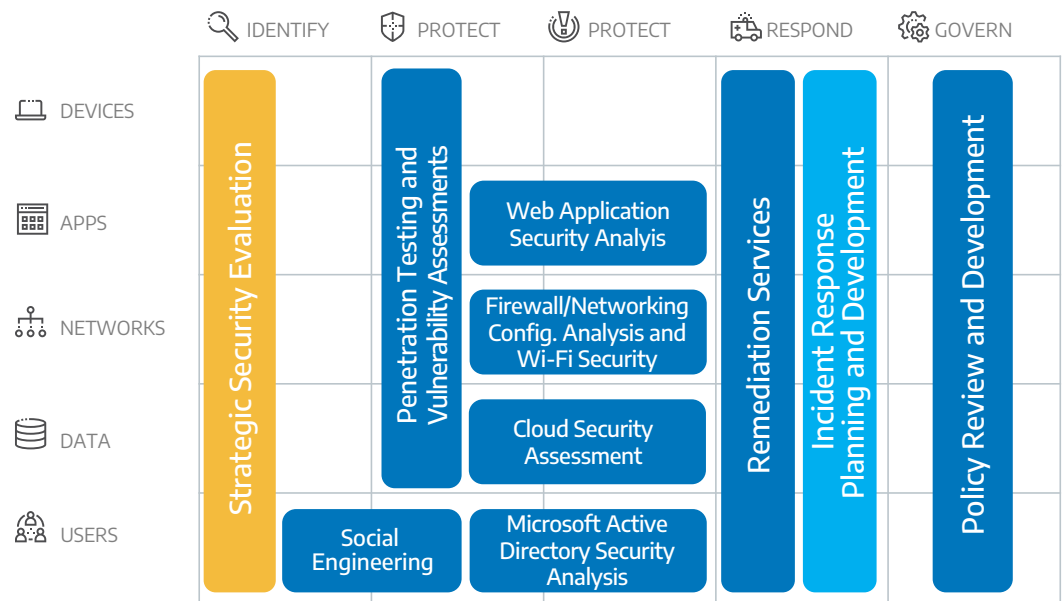

We provide detailed reporting of all risks and vulnerabilities discovered via an executive summary, technical reports, and remediation plans. Connection can assist in the remediation efforts, as well as deliver managed services to ensure optimal performance.

Why Our Security Assessment Suite?

A comprehensive cybersecurity assessment of your entire infrastructure is not just a precaution—it's a critical necessity. Here's why:

- **Interconnected System Protection:** Mitigates risks across deeply interconnected IT environments
- **Policy and Practice Alignment:** Ensures security policies reflect and protect your current infrastructure
- **Customized Risk Profile:** Provides insights tailored to your organization's specific tools, systems, and policies
- **Proactive Threat Mitigation:** Identifies vulnerabilities before they're exploited, reducing risks of breaches and operational disruptions

Connection's Services Cover All Aspects of Your Cyber Defense Model

Why Connection?

Connection offers products, technical expertise, services, and solutions to help your business adapt to the ever-changing technology landscape. We drive innovation through delivery and deployment, and by leveraging our knowledge, we can help to ensure you optimize your investments and improve ROI by reducing risks and costs.
