How AI PCs Transform The Employee Experience

Personalized

Streamline workflows, optimize performance, and enhance the user experience

Predictive Search:

Anticipate search queries based on contextual user behavior.

Device Assistant:

Tailor device settings and functionality based on user preferences.

Productive

Enhance outputs with AI-assisted content creation and predictive insights

Content Generation: Create high-quality content with advanced models.

Predictive Analytics: Quickly forecast trends and outcomes through local processing.

Protected

Deliver proactive security measures, fraud detection, and cyber-resilience

Data Security:

Safeguard sensitive data by utilizing advanced encryption.

PC Lifecycle Management:

Predict failures and ensure timely updates.

Next-gen AI performance has arrived.

The benefits of AI are now available for your organization with the **Lenovo ThinkPad T14s Gen 6 advanced by AMD Ryzen™ AI 7 PRO 360 processors.**

¹ AI Outlook: Are IT teams prepared for AI's mainstream moment | ² The economic potential of generative AI: The next productivity frontier
