We're Experts. Seriously.

Most IT leaders tell us their teams are stuck firefighting instead of innovating. They're juggling complex migrations, rising cloud costs, and a persistent skills gap—all of which hold the business back. The experts at Connection are trained to solve this very issue.

As a **Microsoft Azure Expert MSP**—a distinction held by fewer than 1% of Microsoft partners worldwide—we act as an extension of your team. From designing a secure foundation and migrating workloads, to continuously optimizing your spend and modernizing for AI, our end-to-end Azure services ensure your cloud environment drives business forward.

We Solve Your Challenges

- **Unpredictable Costs:** Eliminate wasted spend with workload optimization and cost governance.
- **Skills Gaps:** Extend your team with certified Azure experts you don't have to hire.
- **Daily Firefighting:** Offload patching, monitoring, and support so your team can focus on strategy.
- **Security and Compliance:** Minimize risk with managed detection, response, and compliance frameworks.
- **Complex Infrastructure:** Move away from aging, inefficient architecture to modern, scalable Azure.

Our Comprehensive Approach

Our Azure solutions are grounded in Microsoft's Well-Architected Framework and delivered through Azure Landing Zones—two critical elements to ensure security, scalability, and governance. From there, we can fine-tune, optimize, and manage your environment so you can focus on what matters most.

Our service lifecycle consists of six distinct phases, each designed to support technology infrastructure development, regulatory compliance, and operational efficiency.

DESIGN

We build a strategic, data-driven roadmap that aligns your Azure investment with your core business objectives.

IMPLEMENT

We deploy a secure, automated, and enterprise-ready Azure foundation built on Microsoft best practices.

MIGRATE

We move your existing workloads, applications, and data to Azure with proven methodologies that minimize business disruption.

RATIONALIZE

We transform your applications and data to unlock true cloud-native agility and prepare your business for the era of AI.

OPTIMIZE

We continuously fine-tune your Azure environment for cost, security, and performance to ensure you get maximum value from your investment.

MANAGE

We operate as an extension of your team, providing 24x7 expert oversight to keep your Azure environment secure, reliable, and stable.

We Deliver Business Value

- **Strategic Focus and Productivity:** Free your IT team from low-value tasks so they can accelerate innovation and deliver on high-priority business initiatives.
- **AI and Data Readiness:** Build a modern foundation that positions your business to leverage AI and advanced analytics, driving smarter decisions and competitive advantage.
- **Financial Control and ROI:** Gain full visibility into your Azure spend, ensuring every dollar contributes directly to growth and operational efficiency.
- **Resilience and Performance:** Run critical applications on a secure, scalable, and well-architected environment designed for reliability, uptime, and future scalability.
- **Business Agility:** Shorten time-to-market for new services, improve customer experience, and adapt quickly to shifting demands with Azure-native innovation.
