

Endpoint security: A perfect storm of complexity and risk.

01

Endpoints, applications, and users have become more prolific and difficult to define.

New malware variants detected on endpoints per day in 2016

1,000,000

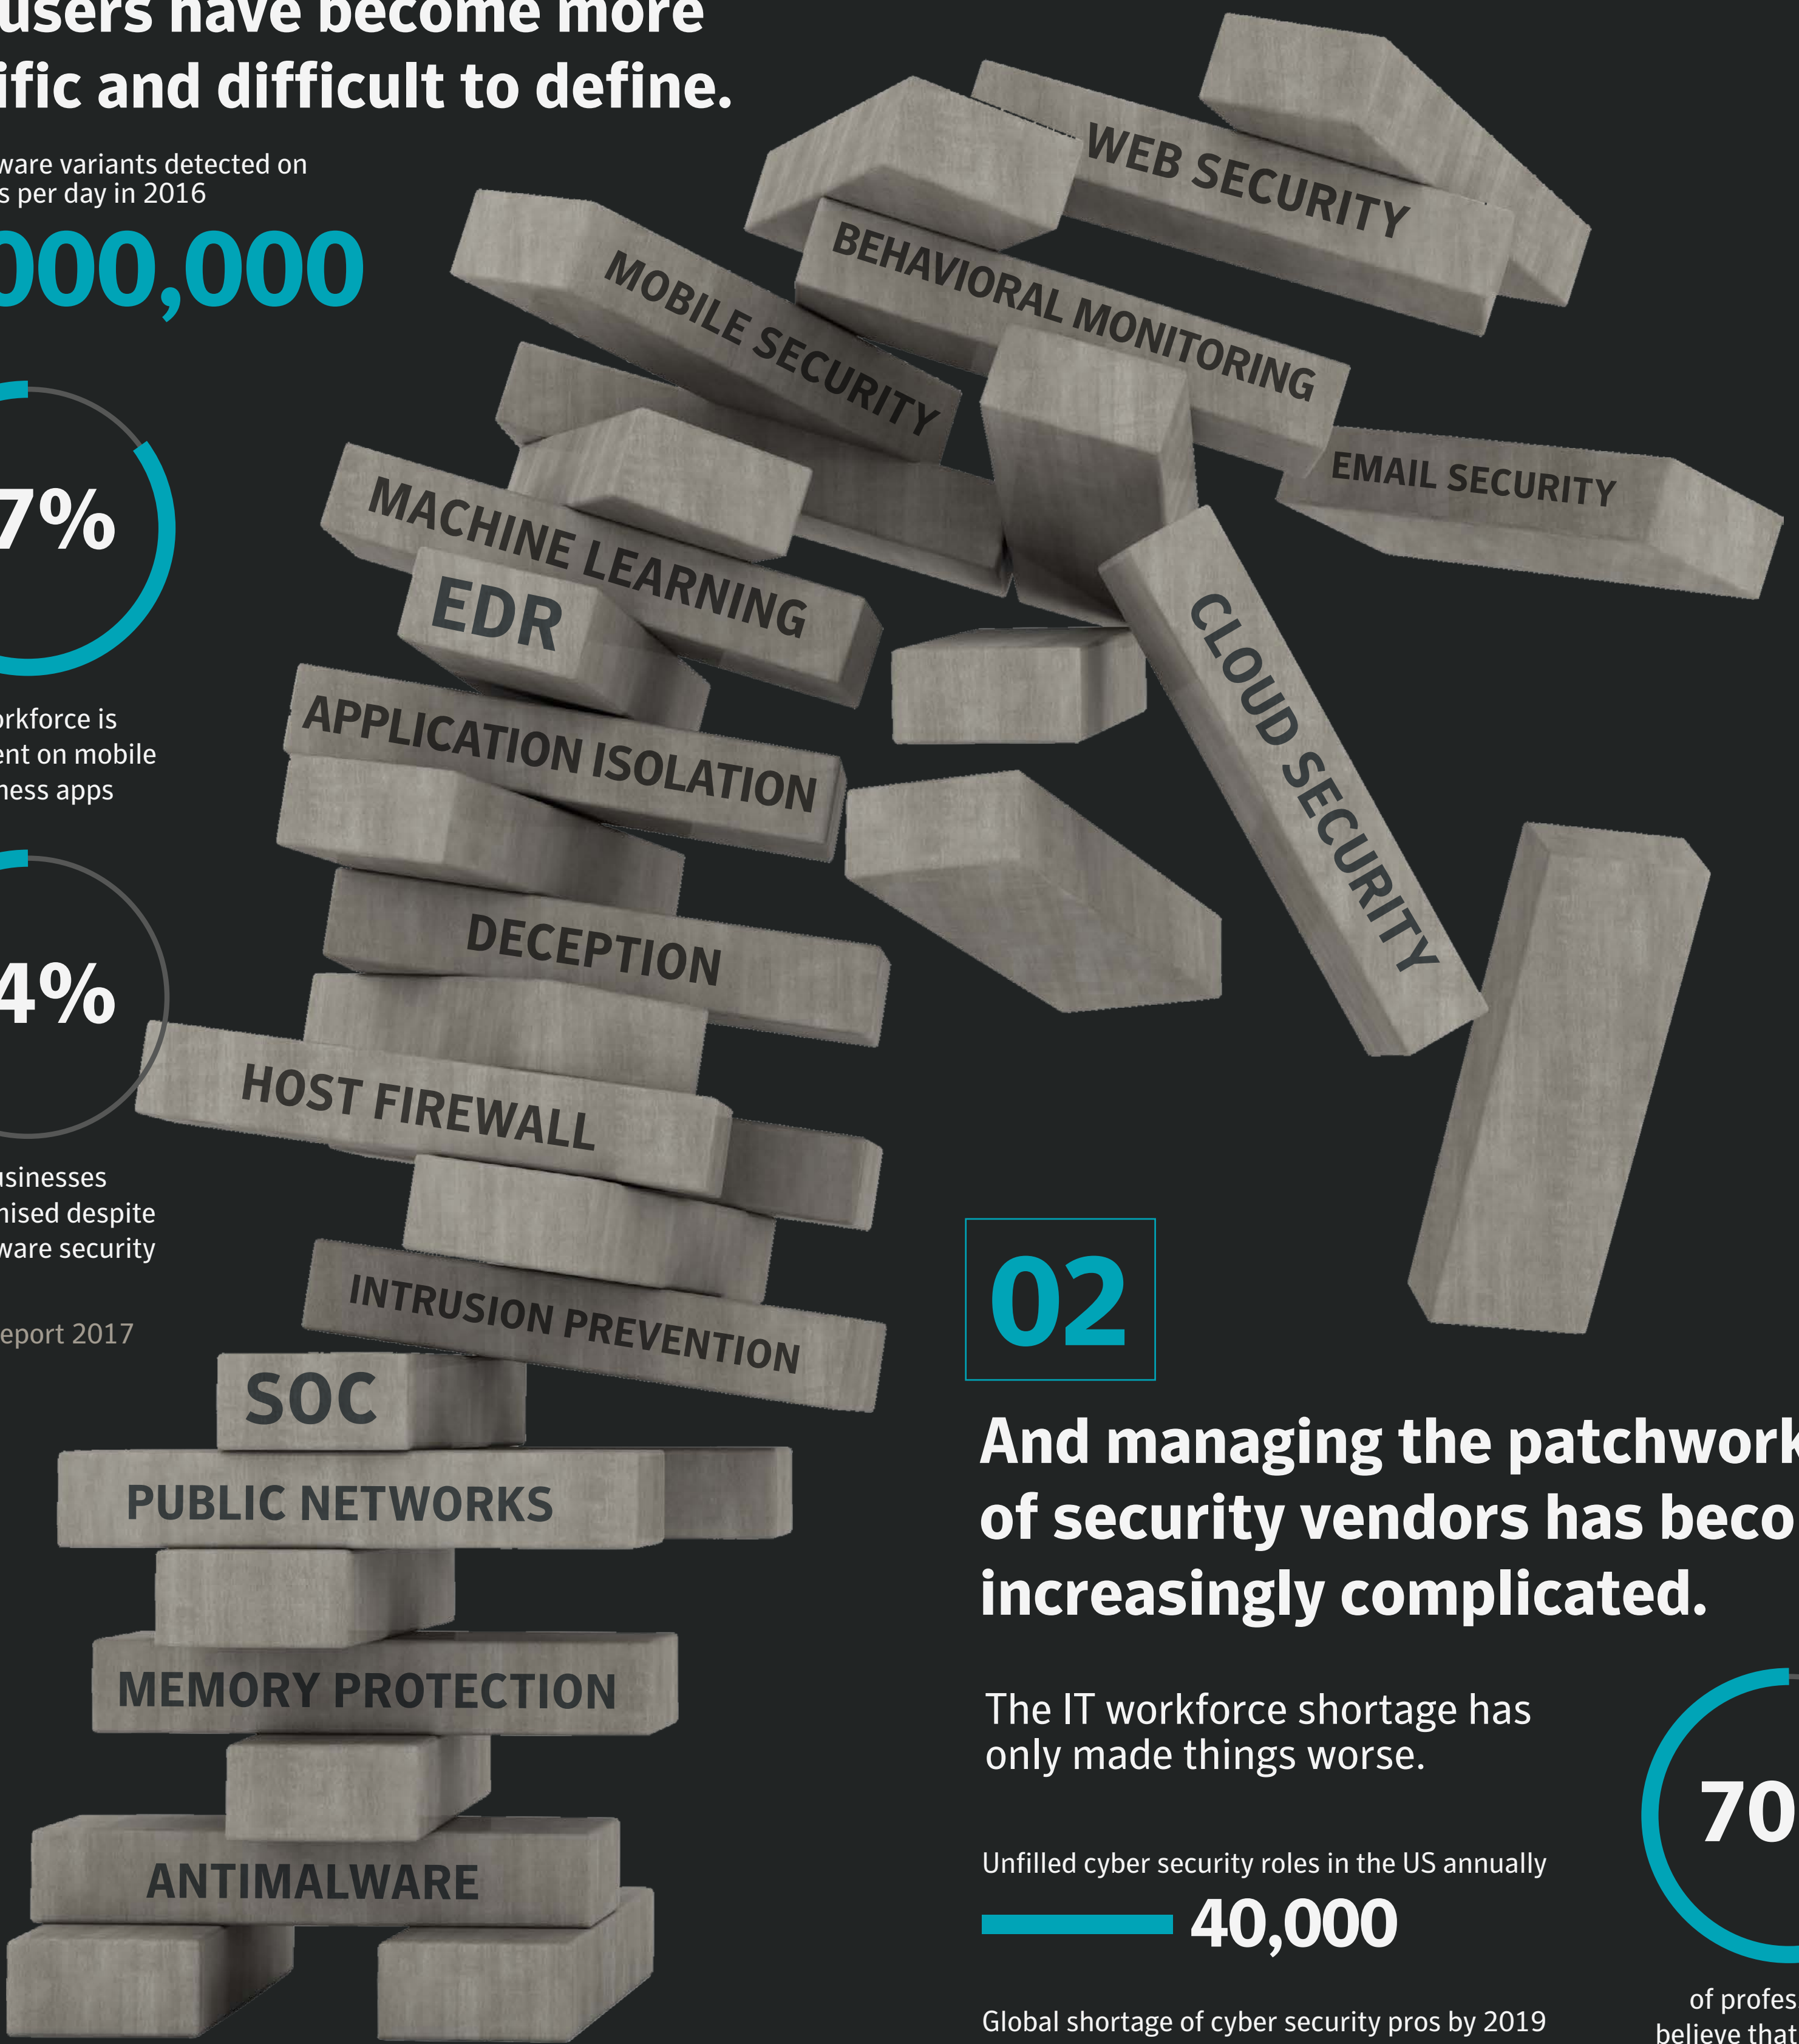

87%

of workforce is dependent on mobile business apps

44%

of businesses compromised despite antimalware security

ISTR Report 2017

02

And managing the patchwork of security vendors has become increasingly complicated.

The IT workforce shortage has only made things worse.

Unfilled cyber security roles in the US annually

40,000

Global shortage of cyber security pros by 2019

2 Mil

70%

of professionals believe that the cyber security skills shortage negatively impacts their organizations

Cyber Seek (2017), ISACA (2017), ESG (2017)

03

All this complexity results in gaps and breaches in security.

New malware variants detected in 2016

357,000,000

Identities exposed in data breaches in the last 8 years

7,100,000,000

ISTR Report 2017

Increase in targeted attacks in 2016

55%

Increase of ransomware in 2016

36%

Simplify with Symantec Endpoint Security.

Only Symantec provides single agent endpoint security with no gaps.

Endpoints protected

175,000,000

Malicious emails stopped annually

1,000,000,000+

Web attacks blocked annually

40,000,000,000+

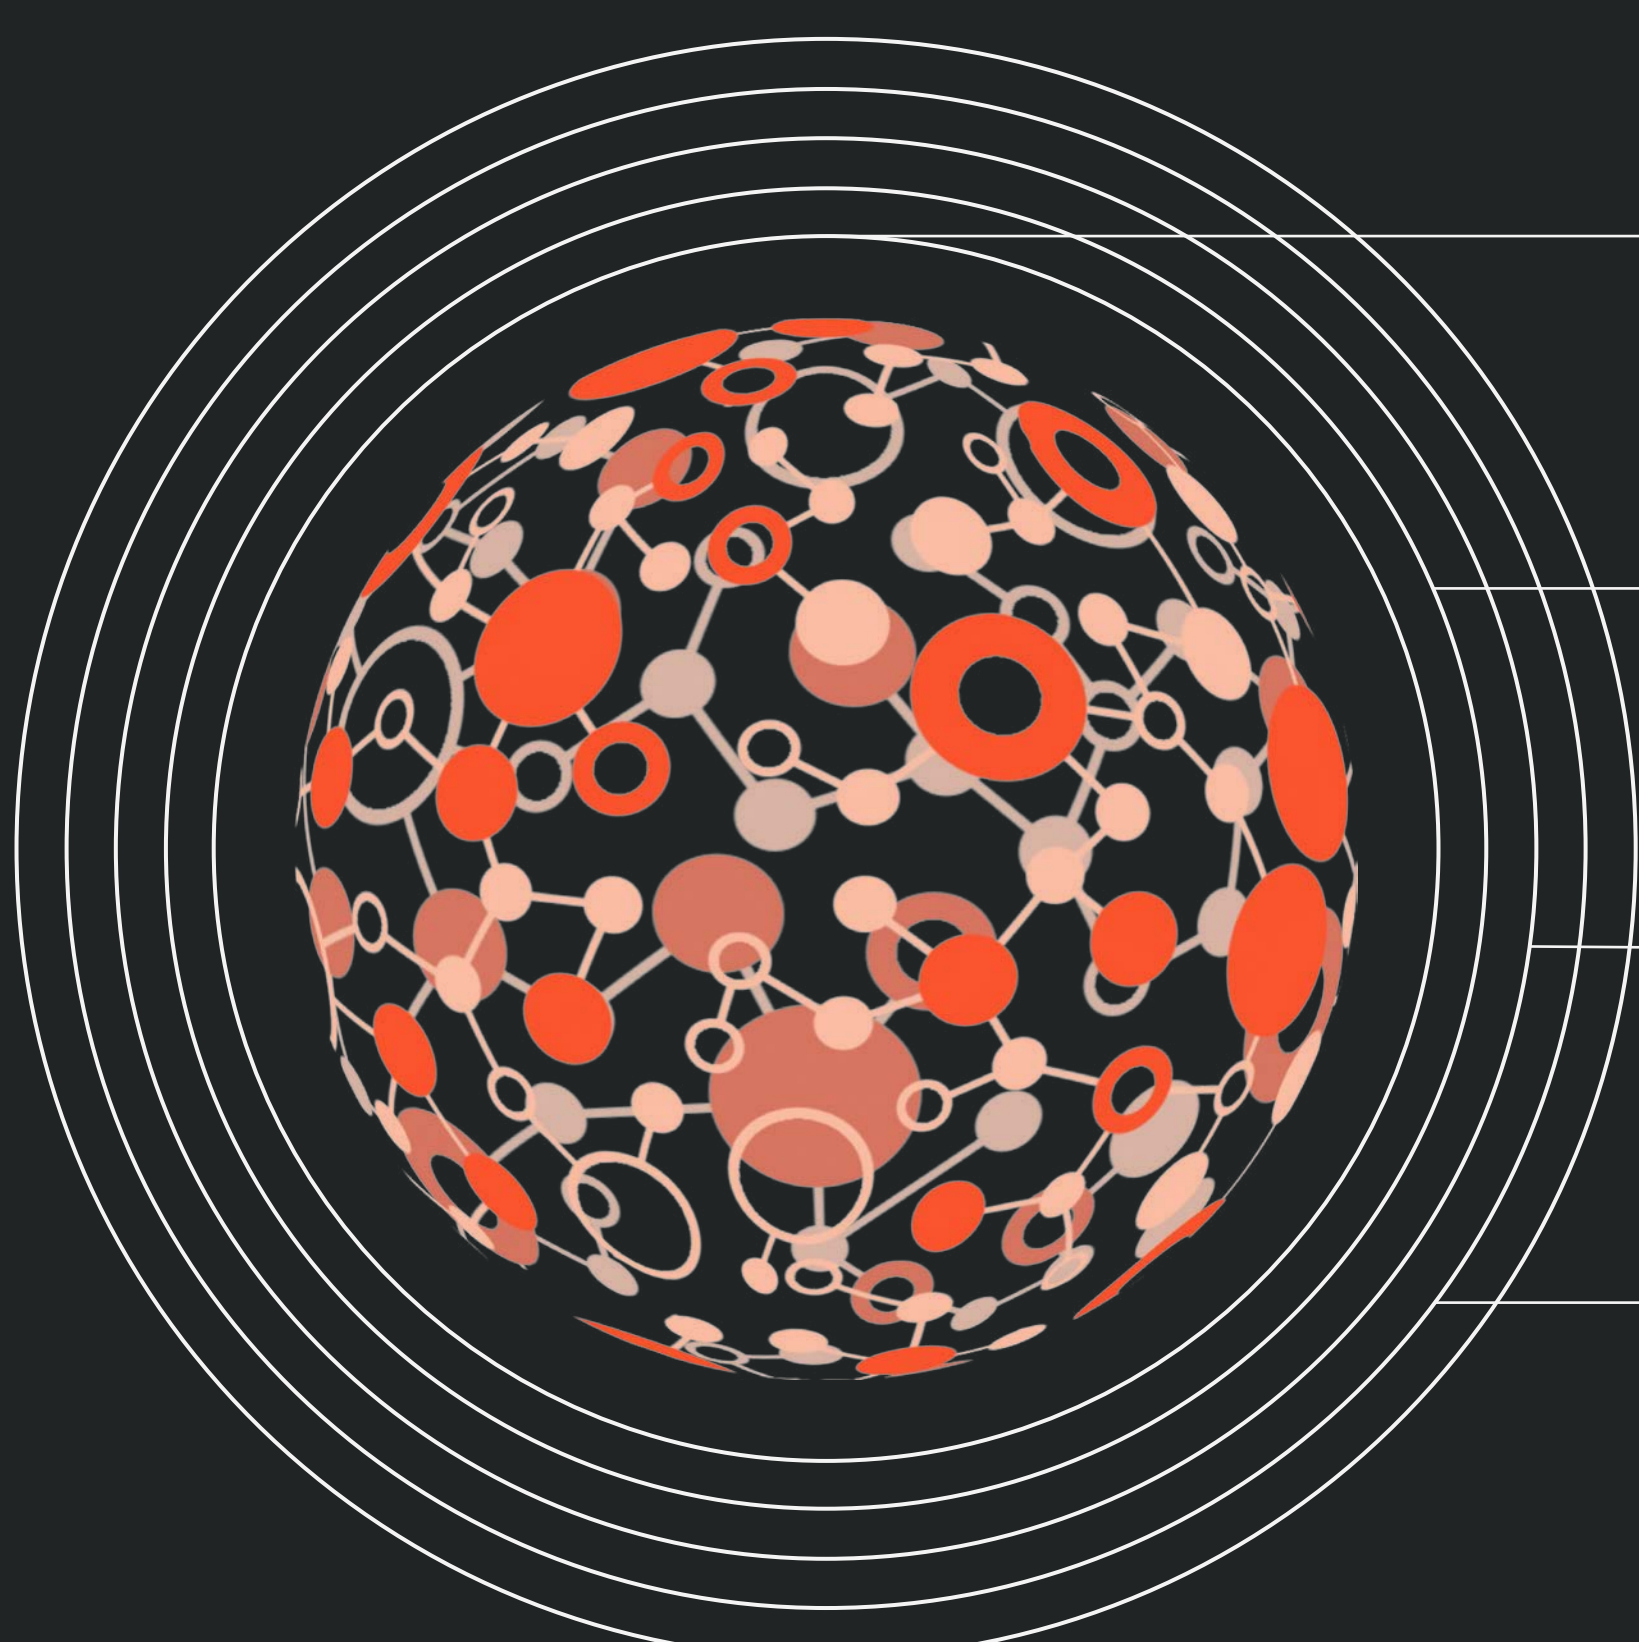

1 Billion and counting Wannacry infection attempts blocked

Over 730 Billion Emails scanned annually

The most advanced, multilayered endpoint security.
